

ENERGY ACTION PLAN

INTRODUCTION

Energy use is one of the main areas where Clubs can reduce costs and environmental impact at the same time. From lighting and heating to equipment and appliances, small changes in how energy is used and managed can deliver long-term savings and improved efficiency.

This action plan supports your Club to identify and plan practical energy actions that work for your facilities, whether you own your buildings or use shared or third-party venues.

HOW TO USE THIS ACTION PLAN

Use the table in this document to record the energy actions your Club plans to take. Start by selecting a small number of realistic actions that align with your Green Goals and the resources available to your Club.

For each action, note what will be done, who is responsible and when you aim to review progress. You do not need to complete everything at once. Focus on actions that feel achievable and build momentum over time.

Regularly reviewing your action plan will help track progress, identify savings and inform future decisions.

ACTION PLAN – ENERGY

ACTION TO BE TAKEN	LINK TO GREEN GOAL	WHAT WILL BE DONE	WHO IS RESPONSIBLE	TIMESCALE	SUPPORT NEEDED	PROGRESS / REVIEW NOTES
Replace clubhouse lighting with LED.	Reduce energy use and costs.	Audit current lighting and replace with LED during routine maintenance.	Facilities Officer.	By March 2027.	Local electrician, potential grant.	LED installed in main areas, noticeable reduction in lighting costs.
Introduce switch off reminders.	Improve energy awareness.	Install reminder signage and brief teams and volunteers.	Together Greener Lead.	Immediate.	Printable signage.	Good uptake, reduced lights left on after sessions.

Together Greener Programme

FURTHER SUPPORT

Clubs are encouraged to start with simple energy efficiency actions and build ambition over time. Reviewing progress regularly helps ensure actions remain relevant and effective.

Further information on energy actions and resources can be found at www.faw.cymru/TogetherGreener
